ADP Time Kiosk app

Employee timecard corrections

- Meal attestation: Employees can attest a meal was taken during their shift
- Missed punch correction: Employees can submit a missed punch
- Punch retraction: Employees can take corrective action if the incorrect option was chosen by mistake (e.g. Take Meal instead of End Work)

Advanced Scheduling

- Cost management: Estimated cost of the schedule based on employee rates
- Draft/Publish: Allow shifts to be hidden from employee view until they are published
- Employee availability: Employees can identify the times they are available to work
- Post/Claim open shift: Employees can claim open shifts posted by supervisors
- Request for cover and drop shifts
- Schedule rules: Set a max for daily and weekly hours worked, consecutive days worked, and number of minimum hours required between shifts
- Schedule notifications: Upcoming shifts, reminders, available shifts and more
