

Amazon Freight Partner (AFP) Payments Guide

This guide provides insight into how and when Amazon pays for work completed and rejections. We ask that your company reads this guide to ensure it is maximizing its business potential.

Invoices

The Relay for Carrier (R4C) portal is Amazon's work-tracking tool. It tracks your company's Blocks, Post A Truck, and Relay Load Board completed work. Your company's work is collected during the workweek from Sunday through Saturday. The operations team verifies that the captured work is correct and manually corrects inaccurate information.

Your company should review the Relay payments tab each day and check that your Blocks, Post A Truck, and Relay Load Board work are recorded correctly. If all entries are correct, your company doesn't need to take any action. If any entries are wrong, it is your company's responsibility to request a change within 30 days from the invoiced date.

Rate card

Payment rates are set by service area (geography) and are dependent on the types of services performed. Each AFP is provided a rate card at the start of the program that outlines what Amazon agrees to pay that AFP for completed work. The rate card may be adjusted quarterly by Amazon based on industry prices and the addition of new Amazon provided services (e.g. Amazon Partner Parking) when needed.

Hourly Base Rate:

Your company will be paid an hourly rate per assigned Trip hour for work it accepts, based on the total number of Trip hours scheduled by Amazon (Hourly Base Rate). In order to be eligible for the Hourly Base Rate, your company's drivers must complete the scheduled Trips. If your company uses a Program Tractor to execute a Trip, your company's Hourly Base Rate for such Trip will be reduced by a maintenance allowance (Maintenance Allowance) to cover the cost of Amazon's maintenance for such Program Tractor.

Incentive Rate:

Your company will be paid an hourly incentive rate per assigned Trip hour for work it accepts, based on the total number of Trip hours scheduled by Amazon (Incentive Rate). In order to be eligible for the Incentive Rate, your company's drivers must complete the scheduled Trips.

Please consult your company's legal, accounting, and/or tax advisor to review your rate card, monthly activity, and prepare your quarterly, annual, and other tax forms as required for your business.

Rejection Payment Terms

Blocks populate with loads usually 12–32 hours before the driver's first scheduled arrival time.

If Amazon cancels all loads in a Block, but the Block is still active, Amazon might repopulate loads in that Block. Your company is responsible for executing loads added to such Block. Amazon will pay your company for the entire Block per the rate card applicable to your company, even if the Block remains empty. Your company will not be paid if you reject retendered loads. Please reach out to ROC if your company has additional questions about load cancellations.

Reject at the Block level when:

- Your company knows it will not have adequate driver or tractor capacity for a given day (for instance your company's tractor is out of service and you do not have a loaner available)
- Your company knows it will not have the required drivers or tractors in place
- Relay Operations Center (ROC) is unable to provide your company with an ETA 32 hours before the Block's start time for when its tractors repairs will be completed and your company does not have a loaner to cover the Block

Reject at the Load level when:

- There is an unexpected tractor or driver capacity issue where backup loaners and/or drivers are not available and the Block has already been populated with tours
- When there are unexpected issues that arise during execution of the tour (i.e.: Hours of Service, weather, mechanical breakdown)

Below are categories and guidelines for when rejections will be reimbursed.

Load/Block rejection reason codes	When to use this Rejection Code	Amazon will pay	Amazon does NOT pay
WEATHER	Severe weather circumstances (i.e. snow, flooding, fires) that cause unsafe driving conditions or road closures	Must be pre-approved by Amazon	
HOURS_OF_SERVICE_CARRIER	A scheduled driver has run out of Hours of Service in the middle of a tour due to a partner-controllable reason		✓
MEDICAL	A driver has a medical issue and is unable to complete future work		✓

Load/Block rejection reason codes	When to use this Rejection Code	Amazon will pay	Amazon does NOT pay
DRIVER_ATTRITION	A partner has lost drivers and does not have the capacity to complete future work based on a reduced headcount		✓
DRIVER_PERSONAL_CONFLICT	A driver has a personal issue that does not allow them to complete planned work. This may include a driver being unable to work at the scheduled time or a driver with a personal emergency		✓
MECHANICAL_TRACTOR	A tractor is having mechanical issues, which prevents your company from completing future work		
	5th wheel damage		✓
	At-fault accident		✓
	Not-at-fault accident	✓	
	Incorrect ELD installation		✓
	Low fuel		✓
	Location experiencing fuel shortage	✓	
	All other partner-controllable mechanical issues		✓
	All other Amazon-controllable mechanical issues	✓	
MECHANICAL_TRAILER	A trailer is having mechanical issues (i.e. flat tire, electrical issues)	✓	
DOT_INSPECTION	A partner is stopped for a DOT inspection, causing a delay or out-of-service (OOS) vehicle		✓
INCORRECT EQUIPMENT	A partner does not have the correct equipment to complete scheduled work. (i.e. partner has box trucks and a 53' is needed or a trailer was needed for a live load/unload and driver did not bring one)		✓

Please note if your company is offered a permloader or another available loader and does not accept it, your company will not be paid for any related rejected work.

Fuel

Amazon provides your company with fuel cards that it is required to use to purchase diesel and compressed natural gas (CNG) fuel. Fuel purchases made without using your company's fuel cards will not be paid by Amazon.

Tolls

Rule	Charge	Definition / Terms
Toll Transponder	Amazon pays directly for Amazon Branded Tractors	For Amazon Branded Tractors, Amazon incurs all costs. Toll accessorial reimbursements will not appear on your company's weekly invoices. All Amazon Branded Tractors have a toll transponder included, which allows toll bills to be passed directly to Amazon for Amazon tendered work.
Toll Allowance	Amazon does not pay directly for Non-Program Tractors	For any Non-Program Tractor that has not had an Amazon toll transponder installed, the toll allowance for any particular Route will be calculated with Amazon's latest version of PC Miler, which uses the zip code of the origins and destinations. Your company is responsible for paying all toll charges directly to the toll authorities as well as any violations, penalties, and service fees resulting from your company's nonpayment of such toll charges. If Amazon is charged for any such violations, penalties, or fees, Amazon may offset such amounts against any amounts owed to your company under this Agreement.

Amazon Cancelled Routes

Paid the rate for the assigned driver type

If Amazon tenders a Trip (other than spot work) that is later cancelled by Amazon, then Amazon will pay your company the applicable Hourly Base Rate and Incentive Rate for the cancelled Trip; provided, that (a) such Trip was cancelled more than 24 hours after the original Trip tender, (b) such cancellation was solely for reasons related to changes in Amazon's planning or network needs, as shown on your company's weekly invoice, and (c) Amazon will not be obligated to pay for any Trips which you reject.

If Amazon tenders and your company accepts spot work that is later cancelled by Amazon, then Amazon will pay your company the applicable Hourly Base Rate and Incentive Rate for the cancelled Trip; provided, that (a) such Trip was cancelled less than 24 hours prior to the Trip start, and (b) such cancellation was solely for reasons related to changes in Amazon's planning or network needs, as shown on your company's weekly invoice.

Layover

Layover requires prior approval from Relay Operations Center. If Amazon planning causes a driver to take an unplanned Hours of Service (HOS) reset in order to complete a Trip, resulting in an extension of Trip length of at least 10 hours, your company is entitled to a layover charge not to exceed \$250.

Best Practices

- **Hours of Service (HOS).** We recommend that your company monitor drivers' HOS to reduce rejections and take on additional work from Relay Load Board and Post A Truck.
- **Permaloader.** When your company is offered a permaloader, we recommend accepting it. Permaloaders are trucks that Amazon provides to support your company's maintenance needs when it has tractors out of service.
- **Loader Pool.** Please contact the Relay Operations Center (ROC) to check your company's domicile loader pool availability if you have a unit go down.
- **Additional best practices.** Please refer to the [Rejections Best Practice Guide](#) in Relay in addition to the [Maintenance Best Practices Guide](#).
